

CEO message ;

Dear All GDI staff,

I'm pleased to briefly indicate that for the last eight months , GDI's gross revenue was improved, reporting an increase of 1%. In the meantime, the net loss for the period were lower by 24%.

This indicates that the cost optimizations initiatives that we have already introduced from almost three years and are being currently pursued ,have resulted in a better operational efficiency and also in a better financial cost saving .

This was achieved without compromising on operation and safety standards.

I would like to take this opportunity to thank all our staff and management team members for their commitment towards GDI's success and I'm confident that the future is bright .

Regards,

Mubarak A. Al-Hajri
CEO
